CHEMICO-BIOLOGICAL INTERACTIONS

SUBJECT INDEX

VOLUME 66 (1988)

N-Acetoxy-2-acetylaminofluorene, covalent binding, DNA, steroidal esterase activity, human mononuclear leukocytes, 13
Agarose gel electrophoresis, phenothiazines, benzothiadiazines, UV-A light, plasmid pBR 322, DNA nicking, 27
Animals, carcinogenesis, DNA-alkylation, nitrosamines, 37
Anti-estrogens, breast cancer, cell proliferation, diphenylmethane derivatives, 101
Aromatic amine, N-acetylation, hepatocytes, 71
ATP, liver, carcinogenesis, fluorenylacetamide, ethionine, 287
5-Aza-2′-deoxycytidine, cadmium, metallothionein, 189

p-Benzoquinone, ferrylmyoglobin, metmyoglobin, hydrogen peroxide, 1,4-naphthoquinone, quinone epoxides, 2-OH-1,4-naphthoquinone, 233
Benzothiadiazines, phenothiazines, UV-A light, plasmid pBR 322, DNA nicking, agarose gel electrophoresis, 27
Benzo[*a*]pyrene, polycyclic aromatic hydrocarbon, carcinogenesis, DNA-carcinogen adducts, linear dichroism, intercalation, benz[*a*]anthracene, 121
Benz[*a*]anthracene, polycyclic aromatic hydrocarbon, carcinogenesis, DNA-carcinogen adducts, linear dichroism, intercalation, benzo[*a*]pyrene, 121
Breast, TCDD, induction, human cancer cells, 223
Breast cancer, anti-estrogens, cell proliferation, diphenylmethane derivatives, 101

Cadmium, 5-aza-2′-deoxycytidine, metallothionein, 189
—, metallothionein, lymphocytes, monocytes, 61
Carbon tetrachloride, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, linoleic acid, lipid peroxidation, rat, liver, 267
Carcinogenesis, liver, fluorenylacetamide, ethionine, ATP, 287
—, polycyclic aromatic hydrocarbon, DNA-carcinogen adducts, linear dichroism, intercalation, benzo[*a*]pyrene, benz[*a*]anthracene, 121
—, DNA-alkylation, animals, nitrosamines, 37
Castration, nitrosobisoxopropylamine, rats, tumors, DNA-alkylation, estradiol, 111
Cell death, hepatocytes, disulfiram, diethyldithiocarbamate, lipid peroxidation, 251
Cell proliferation, breast cancer, anti-estrogens, diphenylmethane derivatives, 101
Covalent binding, *N*-acetoxy-2-acetylaminofluorene, DNA, steroidal esterase activity, human mononuclear leukocytes, 13
Cytochrome oxidase activity, DMSO effects, liver mitochondria, 147

Dansyl chloride, nucleic acid, fluorescence, postlabeling, DNA damage, HPLC, 85
Deoxymyoglobin, ferrylmyoglobin, metmyoglobin, oxymyoglobin, glutathione, menadione, menadiol-glutathione conjugate, 205
Diethyldithiocarbamate, hepatocytes, disulfiram, lipid peroxidation, cell death, 251
Dihydrodiol, polycyclic aromatic hydrocarbons, picene, metabolism, microsomal, dihydrodiol epoxide, phenol, 157
Dihydrodiol epoxide, polycyclic aromatic hydrocarbons, picene, metabolism, microsomal, dihydrodiol, phenol, 157
2,4-Dinitrophenylhydrazine derivative, malondialdehyde, urine-analysis, HPLC, 177
Diphenylmethane derivatives, breast cancer, anti-estrogens, cell proliferation, 101
Disulfiram, hepatocytes, diethyldithiocarbamate, lipid peroxidation, cell death, 251
DMSO effects, cytochrome oxidase activity, liver mitochondria, 147

DNA, covalent binding, *N*-acetoxy-2-acetylaminofluorene, steroidal esterase activity, human mononuclear leukocytes, 13
DNA-alkylation, carcinogenesis , animals, nitrosamines, 37
—, nitrosobisoxopropylamine, rats, tumors, estradiol, castration, 111
DNA-carcinogen adducts, polycyclic aromatic hydrocarbon, carcinogenesis, linear dichroism, intercalation, benzo[*a*]pyrene, benz[*a*]anthracene, 121
DNA damage, nucleic acid, fluorescence, postlabeling, dansyl chloride, HPLC, 85
DNA nicking, phenothiazines, benzothiadiazines, UV-A light, plasmid pBR 322, agarose gel electrophoresis, 27

Estradiol, nitrosobisoxopropylamine, rats, tumors, DNA-alkylation, castration, 111
Ethionine, liver, carcinogenesis, fluorenylacetamide, ATP, 287

Ferrylmyoglobin, metmyoglobin, hydrogen peroxide, *p*-benzoquinone, 1,4-naphthoquinone, quinone epoxides, 2-OH-1,4-naphthoquinone, 233
—, —, oxymyoglobin, deoxymyoglobin, glutathione, menadione, menadiol-glutathione conjugate, 205
Fluorenylacetamide, liver, carcinogenesis, ethionine, ATP, 287
Fluorescence, nucleic acid, postlabeling, dansyl chloride, DNA damage, HPLC, 85

Glutathione, ferrylmyoglobin, metmyoglobin, oxymyoglobin, deoxymyoglobin, menadione, menadiol-glutathione conjugate, 205

Hepatocytes, aromatic amine, N-acetylation, 71
—, disulfiram, diethyldithiocarbamate, lipid peroxidation, cell death, 251
HPLC, malondialdehyde, urine-analysis, 2,4-dinitrophenylhydrazine derivative, 177
—, nucleic acid, fluorescence, postlabeling, dansyl chloride, DNA damage, 85
Human cancer cells, TCDD, induction, breast, 223
Human mononuclear leukocytes, covalent binding, *N*-acetoxy-2-acetylaminofluorene, DNA, steroidal esterase activity, 13
Hydrogen peroxide, ferrylmyoglobin, metmyoglobin, oxymyoglobin, deoxymyoglobin, glutathione, menadione, menadiol-glutathione conjugate, 205
—, —, —, *p*-benzoquinone, 1,4-naphthoquinone, quinone epoxides, 2-OH-1,4-naphthoquinone, 233
Hydrogen peroxide, phorbol esters, SENCAR mice, macrophages, 1

Induction, *N*-nitrosodiethylamine, *N*-nitrosodimethylamine, *N*-nitrodiethylamine, UDP-glucuronosyltransferase, rat liver, 49
—, TCDD, human cancer cells, breast, 223
Intercalation, polycyclic aromatic hydrocarbon, carcinogenesis, DNA-carcinogen adducts, linear dichroism, benzo[*a*]pyrene, benz[*a*]anthracene, 121

Linear dichroism, polycyclic aromatic hydrocarbon, carcinogenesis, DNA-carcinogen adducts, intercalation, benzo[*a*]pyrene, benz[*a*]anthracene, 121
Linoleic acid, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, carbon tetrachloride, lipid peroxidation, rat, liver, 267
Lipid peroxidation, hepatocytes, disulfiram, diethyldithiocarbamate, cell death, 251
—, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, carbon tetrachloride, linoleic acid, rat, liver, 267
Liver, carcinogenesis, fluorenylacetamide, ethionine, ATP, 287
—, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, carbon tetrachloride, linoleic acid, lipid peroxidation, rat, 267
Liver mitochondria, DMSO effects, cytochrome oxidase activity, 147
Lymphocytes, cadmium, metallothionein, monocytes, 61

Macrophages, hydrogen peroxide, phorbol esters, SENCAR mice, 1
Malondialdehyde, urine-analysis, HPLC, 2,4-dinitrophenylhydrazine derivative, 177
Menadiol-glutathione conjugate, ferrylmyoglobin, metmyoglobin, oxymyoglobin, deoxymyoglobin, glutathione, menadione, 205
Menadione, ferrylmyoglobin, metmyoglobin, oxymyoglobin, deoxymyoglobin, glutathione, menadiol-glutathione conjugate, 205
Metabolism, polycyclic aromatic hydrocarbons, picene, microsomal, dihydrodiol, dihydrodiol epoxide, phenol, 157
Metallothionein, 5-aza-2′-deoxycytidine, cadmium, 189

—, cadmium, lymphocytes, monocytes, 61
Metmyoglobin, ferrylmyoglobin, hydrogen peroxide, *p*-benzoquinone, 1,4-naphthoquinone, quinone epoxides, 2-OH-1,4-naphthoquinone, 233
—, —, oxymyoglobin, deoxymyoglobin, glutathione, menadione, menadiol-glutathione conjugate, 205
Microsomal, polycyclic aromatic hydrocarbons, picene, metabolism, dihydrodiol, dihydrodiol epoxide, phenol, 157
Monocytes, cadmium, metallothionein, lymphocytes, 61

N-acetylation, aromatic amine, hepatocytes, 71
1,4-Naphthoquinone, ferrylmyoglobin, metmyoglobin, hydrogen peroxide, *p*-benzoquinone, quinone epoxides, 2-OH-1,4-naphthoquinone, 233
N-Nitrodiethylamine, *N*-nitrosodiethylamine, *N*-nitrosodimethylamine, UDP-glucuronosyltransferase, rat liver, induction, 49
Nitrosamines, carcinogenesis , DNA-alkylation, animals, 37
Nitrosobisoxopropylamine, rats, tumors, DNA-alkylation, estradiol, castration, 111
Nitrosodiethylamine, *N*-nitrosodimethylamine, *N*-nitrodiethylamine, UDP-glucuronosyltransferase, rat liver, induction, 49
N-Nitrosodimethylamine, *N*-nitrosodiethylamine, *N*-nitrodiethylamine, UDP-glucuronosyltransferase, rat liver, induction, 49
Nucleic acid, fluorescence, postlabeling, dansyl chloride, DNA damage, HPLC, 85

2-OH-1,4-naphthoquinone, ferrylmyoglobin, metmyoglobin, hydrogen peroxide, *p*-benzoquinone, 1,4-naphthoquinone, quinone epoxides, 233
Oxymyoglobin, ferrylmyoglobin, metmyoglobin, deoxymyoglobin, glutathione, menadione, menadiol-glutathione conjugate, 205

Phenol, polycyclic aromatic hydrocarbons, picene, metabolism, microsomal, dihydrodiol, dihydrodiol epoxide, 157
Phenothiazines, benzothiadiazines, UV-A light, plasmid pBR 322, DNA nicking, agarose gel electrophoresis, 27
Phorbol esters, hydrogen peroxide, SENCAR mice, macrophages, 1
Picene, polycyclic aromatic hydrocarbons, metabolism, microsomal, dihydrodiol, dihydrodiol epoxide, phenol, 157
Plasmid pBR 322, phenothiazines, benzothiadiazines, UV-A light, DNA nicking, agarose gel electrophoresis, 27
Polycyclic aromatic hydrocarbon carcinogenesis, DNA-carcinogen adducts, linear dichroism, intercalation, benzo[a]pyrene, benz[a]anthracene, 121
—, picene, metabolism, microsomal, dihydrodiol, dihydrodiol epoxide, phenol, 157
Postlabeling, nucleic acid, fluorescence, dansyl chloride, DNA damage, HPLC, 85

Quinone epoxides, ferrylmyoglobin, metmyoglobin, hydrogen peroxide, *p*-benzoquinone, naphthoquinone, 2-OH-1,4-naphthoquinone, 233

Rat, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, carbon tetrachloride, linoleic acid, lipid peroxidation, liver, 267
—, nitrosobisoxopropylamine, tumors, DNA-alkylation, estradiol, castration, 111
Rat liver, *N*-nitrosodiethylamine, *N*-nitrosodimethylamine, *N*-nitrodiethylamine, UDP-glucuronosyltransferase, induction, 49

SENCAR mice, hydrogen peroxide, phorbol esters, macrophages, 1
Steroidal esterase activity, covalent binding, *N*-acetoxy-2-acetylaminofluorene, DNA, human mononuclear leukocytes, 13

TCDD, induction, human cancer cells, breast, 223
2,3,7,8-Tetrachlorodibenzo-*p*-dioxin, carbon tetrachloride, linoleic acid, lipid peroxidation, rat, liver, 267
Tumors, nitrosobisoxopropylamine, rats, DNA-alkylation, estradiol, castration, 111

UDP-glucuronosyltransferase, *N*-nitrosodiethylamine, *N*-nitrosodimethylamine, *N*-nitrodiethylamine, rat liver, induction, 49
Urine-analysis, malondialdehyde, HPLC, 2,4-dinitrophenylhydrazine derivative, 177
UV-A light, phenothiazines, benzothiadiazines, plasmid pBR 322, DNA nicking, agarose gel electrophoresis, 27
